

HEADQUARTERS
ACADEMIC GROUP, PHILIPPINE MILITARY ACADEMY
Fort General Gregorio H del Pilar, Baguio City

ACADEMIC OLYMPICS 2027

**“Navigating Modern Frontlines: Advancing Strategic Thinking
in the Era of Multi-Domain Warfare”**

RULEBOOK

Fort General Gregorio H Del Pilar, Baguio City
August 2026 to January 2027

CONSENT FORM

I, _____ (name), hereby confirm that I have read, understood, and agreed to comply with the rules and regulations of the Academic Olympics 2027 as of this day, _____ (date). By signing this consent form, I grant the contest organizers the following rights and permissions:

1. To publicly disclose and use my name, class/rank, age, and/or entry information for promotional or other purposes.

2. To copy, modify, and use any submission, whether in whole or in part, as part of the competition.

I affirm that all entries I submit are my original and lawful creations. I consent to their use, modification, or reproduction by the contest organizers. I guarantee that my entries will not infringe upon or violate any third-party rights, including but not limited to copyright, trademark, libel, defamation, or intellectual property rights. Additionally, I confirm that I have obtained all necessary permissions, consents, licenses, or approvals from third parties (including individuals appearing in the entries and holders of copyright for any materials used in the entries). Copies of these permissions are attached as required. I release the contest organizers from any liability related to my participation in the competition, as well as the preparation or use of my submissions. I also agree to indemnify the contest organizers for any liabilities and reasonable costs resulting from third-party claims or actions related to my submissions.

Name: _____

Signature: _____

GENERAL GUIDELINES

PARTICIPATION

1. Any cadet from any company, regardless of rank, and those who are not removalists may participate in any event contest except for members of the Organizing Committee. Company Academic Officers (Acad-O) and Education and Training Officers (S8) will serve as over-all coaches to their respective companies. Coaches are prohibited from participating in or contributing to any company outputs unless he/she is a competitor on that competition. Violations of this rule will be reviewed and dealt with by competent authorities.
2. Academic Officers, and Education and Training Officers may join a competition provided that their priority is to perform their duties and responsibilities as over-all company coaches.
3. There should be a designated Cadet-in-Charge (CIC) per competition. The CIC will serve as the team leader and should be part of the roster of competitors in that event that he/she is designated as CIC.
4. All Cadets must actively engage in contest-related activities such as briefings, orientation, contest-proper, film viewings, workshops, and as audience to different competitions. Participation in these activities is mandatory.
5. To maximize Cadets' participation, Cadets may join a maximum of three (3) events, provided these events are scheduled on different days. Participation in more than three (3) events will result in disqualification from all contests entered.
6. Participants for each event will be selected by their respective companies based on the qualifications set in each event. Cadets who are directly in-charge or tasked to assist in any contest is not allowed to compete.
7. Only the Academic Company Adviser is authorized to file protests or complaints on behalf of their company to the Organizing Panel (OP).
8. Company Advisers and Company Academic Officers (AcadOs) are the sole representatives allowed to participate in decision-making processes related to special cases or disputes.
9. Failure of a company to participate in any contest will result in the issuance of a delinquency report to both the Company Commander and the Academic Officer.

CONTEST

1. Recipients of major awards in the competition will receive trophies, while other awardees will be given certificates of recognition for their contributions and achievements.
2. The contests for the Academic Olympics 2027 include the following:

No.	Events
1.	Robotics Competition: Autonomous Ground Drone Racing Challenge
2.	Python Programming
3.	Data Analytics and Artificial Intelligence Datathon
4.	Defense Systems Innovation Challenge
5.	SIMEX: Inter-Company Crisis Management Simulation Exercise
6.	Academic Mustering: Military Undergraduate Symposium for Transformative Engagement in Research
7.	Advocacy Film
8.	Position Paper Challenge
9.	Magsaysay Cup: Debate Open
10.	Language Proficiency Contest
11.	Company Mural
12.	Mathenik: Mathematical Excellence and Knowledge Challenge
13.	Lawpardy: A Law Jeopardy Game
14.	Tactix: The E-games Challenge: • World of Warships • Company of Heroes III • Wargame: Red Dragon

3. The company, which has accumulated the highest overall score across all contests, will be awarded the Acad Olympics 2027 Trophy.

ORGANIZING PANEL

1. A special decision-making body, the Organizing Panel (OP), will address all protests or complaints submitted by Company Advisers or participants. The Organizing Panel refers to the members of the Technical Working Group (TWG) for Academic Olympics.

2. The Organizing Panel's decisions are final and executory.

ADDITIONAL GUIDELINES

1. Entries must be original and comply with intellectual property laws. Plagiarism, copyright infringement, or any form of dishonesty will result in disqualification and disciplinary action.

2. Participants must adhere to submission deadlines and contest-specific guidelines. Late or improperly formatted submissions may be penalized or rejected.

3. All cadets are expected to demonstrate professionalism, integrity, and camaraderie throughout the competition. Any misconduct, including disrespect towards organizers, judges, or fellow participants, will result in disciplinary measures.

4. In case of unforeseen technical issues or emergencies, the Organizing Panel reserves the right to adjust schedules, procedures, or contest rules. All adjustments will be communicated promptly, and the Panel's decisions regarding such changes are final.

5. Content submitted for the contests must reflect the core values of the academy. Submissions containing inappropriate language, offensive material, or content contrary to academy principles will be disqualified.

6. Academic Officers together with Company Education and Training Officers (S8) will be in-charge of planning for their respective Companies' participation in the Academic Olympics. They may take on the role of coaches, providing guidance and support to the selected participants. They may consult their Company Academic Adviser who may provide guidance and direction for the company. They may also designate some Cadets to act as coaches responsible for mentoring players, developing strategies, and ensuring proper training for their assigned event.

EVENTS MECHANICS

Robotics Competition: Autonomous Ground Drone Racing Challenge

Description:

Cadets will compete in a high-intensity autonomous ground drone racing challenge designed to test rapid integration, autonomous programming, sensor utilization, obstacle avoidance, target detection, payload deployment, and mission-oriented decision-making.

Each team will field one autonomous ground drone. A total of eight (8) drones will compete simultaneously on a specially designed racecourse consisting of four mission phases. The competition emphasizes both speed and mission accomplishment, simulating real-world unmanned ground vehicle (UGV) operations in military, logistics, and disaster-response environments. The winning team will be determined based on total mission score. In the event of a tie, the faster overall completion time shall be used as the tiebreaker.

Objectives:

1. Design and integrate autonomous ground robotic systems
2. Program sensor-based navigation algorithms
3. Implement obstacle avoidance behaviors
4. Develop autonomous target recognition logic
5. Execute automated payload deployment
6. Demonstrate mission planning and autonomous decision-making
7. Optimize system performance under competitive conditions

Personnel-in-Charge

Implementing Department: Department of Information Technology
Officer-in-Charge: MAJ TATARO PROF
Assistant: P2LT FERNANDEZ PROF

Team Composition:

Each company will form one (1) team with five (5) members.

Mechanics:

Pre-Competition Preparation

Teams shall arrive with a fully assembled and operational Arduino-based ground drone.

Required Components

Each drone shall include:

- Arduino Controller

- Motor Driver Module
- Chassis and Drive System (per Company: may be fabricated from scrap/recycled materials and/or produced using a 3D printer)
- Obstacle Detection Sensor (Ultrasonic, IR, or equivalent)
- Buzzer Module
- Target Detection Sensor or Camera
- Servo-Based Payload Release Mechanism
- Battery Power System
- Autonomous Navigation Program

All systems must be fully functional prior to inspection.

Competition Phase

Segment 1: Integration, Calibration, and Testing (30 Minutes)

Teams will be provided thirty (30) minutes to:

- Upload and modify mission code
- Calibrate sensors
- Test obstacle avoidance functionality
- Test target detection routines
- Verify payload release mechanisms
- Conduct trial runs in the designated test area

Judges' Inspection (Final 5 Minutes)

Judges will inspect:

- Drone structural integrity
- Sensor functionality
- Autonomous navigation code
- Buzzer operation
- Payload deployment mechanism

Only drones that pass inspection may proceed to the race.

Segment 2: Autonomous Ground Drone Race

Race Format

- Eight (8) autonomous drones will compete simultaneously.
- All drones will begin from designated starting positions.
- No manual intervention is permitted once the race begins.
- The race consists of four sequential mission phases.

Mission Phases

Phase 1: Autonomous Object Avoidance with Buzzer Alert

Mission Requirements

The drone shall:

- Detect an obstacle positioned on the course.
- Activate its buzzer upon obstacle detection.
- Execute an avoidance maneuver.
- Return to the designated race path.

Failure Conditions:

- No obstacle detection
- No buzzer activation
- Collision with obstacle
- Failure to resume course

Phase 2: Autonomous Zigzag Navigation

Mission Requirements

The drone shall:

- Navigate through a designated zigzag section.
- Pass all required checkpoints.
- Maintain continuous forward progress.

Penalties:

- Striking a marker
- Skipping a checkpoint
- Leaving the designated lane

Phase 3: Autonomous Target Detection and Payload Deployment

Mission Requirements

The drone shall:

- Detect the designated target zone.
- Stop or position appropriately.
- Automatically deploy the payload.
- Continue toward the next phase.

Payload Requirements:

- Deployment must be fully autonomous.
- No remote triggering is allowed.

Phase 4: Straight-Line Sprint to Finish

Mission Requirements

The drone shall:

- Proceed toward the finish line.
- Maintain controlled operation.
- Cross the finish line without external assistance.

The order of finish shall be recorded.

Additional Guidelines:

1. The race shall be conducted entirely in autonomous mode.
2. No Bluetooth, Wi-Fi, RF controller, or manual control is permitted once the race begins.
3. Intentional interference with another team's drone is prohibited.
4. Physical contact between drones resulting from reckless programming may incur penalties.
5. Per company, the chassis and/or chassis components may be fabricated from scrap or recycled materials and/or produced using a 3D printer, provided the finished drone still meets all Required Components and passes structural integrity inspection.
6. One restart is permitted before the race begins for verified technical malfunctions.
7. No restart is allowed after the race has officially started.
8. Judges may terminate a run if a drone presents a safety hazard.
9. All judging and scoring decisions are final.

Scoring:

Criteria	Points
Drone Design and Integration	10
Autonomous Object Detection	10
Buzzer Activation	5
Successful Obstacle Avoidance	10
Completion of Zigzag Course	15
Target Detection	10
Successful Payload Deployment	15
Payload Accuracy	10
Finish Position	10
Mission Completion Reliability	5
TOTAL	100

Rubric

Drone Design and Integration (10 Points)

Performance Level	Points
Fully integrated, robust construction, all systems functional	10
Minor issues but fully operational	8
Several integration issues requiring adjustments	6
Significant deficiencies	4
Non-functional components	0–2

Autonomous Object Detection (10 Points)

Performance Level	Points
Detects obstacle immediately and consistently	10
Detects obstacle with minor delay	8
Inconsistent detection	5
Rarely detects obstacle	2
No detection	0

Buzzer Activation (5 Points)

Performance Level	Points
Activates correctly every time	5
Activates with delay	3
Inconsistent activation	1
No activation	0

Successful Obstacle Avoidance (10 Points)

Performance Level	Points
Completely avoids obstacle and resumes path	10
Minor contact but mission continues	7
Requires excessive correction	4
Collision causing mission disruption	1
Fails obstacle phase	0

Zigzag Navigation (15 Points)

Performance Level	Points
Completes entire section without penalties	15
Minor marker contact	12
Multiple contacts	8
Misses checkpoints	4
Fails section	0

Target Detection (10 Points)

Performance Level	Points
Accurate target recognition	10
Minor positioning error	8
Delayed recognition	5
Incorrect identification	2
No recognition	0

Payload Deployment (15 Points)

Performance Level	Points
Successful autonomous deployment	15
Deployment with minor issues	10
Delayed deployment	5
Payload released improperly	2
No deployment	0

Payload Accuracy (10 Points)

Distance from Target	Points
Inside target zone	10
Within 10 cm	8
Within 20 cm	6
Within 30 cm	3
Beyond 30 cm	0

Finish Position Scoring

Position	Points
1st Place	10
2nd Place	8
3rd Place	6
4th Place	5
5th Place	4
6th Place	3
7th Place	2
8th Place	1

Mission Completion Reliability (5 Points)

Performance Level	Points
Completes all phases autonomously without interruption	5
Minor operational issues	3
Significant mission degradation	1
Mission failure	0

Python Programming	
Description: Python-based programming challenge tests logic formulation, algorithmic thinking, basic data handling, and interpretation of problem requirements relevant to military and security inspired scenarios. The teams will compete by solving a series of programming challenges using the Python programming language. The activity enhances cadets' technological awareness, analytical proficiency, and appreciation of how foundational programming skills contribute to higher-level military systems and cyber capabilities. It reinforces PMA's commitment to developing adaptive, intellectually capable officers prepared to lead in an increasingly complex and technology centric security landscape.	
Objectives: 1. Enhance cadets' competencies in basic programming, computational logic, and data driven problem-solving. 2. Promote teamwork, time discipline, and pressure management in an academically competitive environment. 3. Identify and recognize academically outstanding cadets with aptitude in programming and analytical thinking.	
Personnel-in-Charge Implementing Department: Department of Information Technology Officer-in-Charge: CPT VIDAL PROF Assistant: P2LT FERNANDEZ PROF	
Team Composition: Each company will form three (3) teams composed of three (3) First-Class Cadets.	
Mechanics: • There will be three (3) distinct rounds in this competition. In each round, one (1) team from each company will compete; no team may participate in more than one (1) round. • Each team shall compete by solving a series of programming challenges using the Python programming language. • Each round shall consist of multiple stages of increasing difficulty (easy, average, difficult), designed to progressively assess the teams' problem-solving depth and speed. • All programming activities shall be conducted offline. Internet connectivity is strictly prohibited to ensure fairness and integrity of the competition. • The Game Master shall present a Python-based machine/program problem at the start of each round. Teams must analyze the requirements and submit a working Python solution within the prescribed time limit.	

Competition Rounds

The competition shall follow the structure below:

- Easy Round

Number of Programs: Five (5) Points per Program: Two (2) points

Time Limit per Program: Two (2) minutes

- Average Round

Number of Programs: Three (3) Points per Program: Three (3) points

Time Limit per Program: Five (5) minutes

- Difficult Round

Number of Programs: Two (2) Points per Program: Five (5) points

Time Limit per Program: Ten (10) minutes

- Mystery Program (Tie-breaker)

Number of Programs: One (1)

Purpose: To break ties in the final scoring

Additional Guidelines:

1. Prior to the event, participating teams shall be provided with guidelines and a general scope of coverage related to the programming concepts to be used in the competition.
2. Laptop computers shall be provided by each team. The Game Masters will pre-install Python application (same version across all units). External storage devices may be allowed subject to inspection.
3. Teams will be given a reviewer before the event, closely aligned with the anticipated programming problems (e.g., basic syntax, loops, conditionals, functions, simple data handling, and logic formulation).
4. On the day of the competition, preparation and problem-solving shall strictly adhere to the prescribed time limits per round. No external references, notes, or communication devices shall be allowed during the actual competition.

Scoring:

1. The Game Master and designated evaluators shall validate the submitted programs immediately after each round
2. A program must be executed successfully and meet all stated requirements to earn full points.
3. Partial solutions or programs with logical errors shall receive no points unless otherwise specified by the Game Master.
4. Decisions of the Game Master and evaluators are final.

The team/company with the highest cumulative score at the end of all rounds shall be declared the winner.

Data Analytics and Artificial Intelligence Datathon

Description:

Data Analytics and Artificial Intelligence Datathon is a structured academic competition designed for the cadets to exhibit systematic use of data, algorithms, and intelligent systems to support military decision-making and operational planning. The activity uses randomized and hypothetical datasets to ensure security while allowing cadets to apply descriptive, predictive, and prescriptive analytics, as well as AI and ML models, to realistic defense scenarios.

Objectives:

1. Apply data analytics techniques (descriptive, diagnostic, predictive, and prescriptive) to military-relevant problems.
2. Design and evaluate machine learning models for prediction, classification, clustering, and forecasting.
3. Integrate AI-based decision support systems into simulated operational scenarios.
4. Strengthen analytical reasoning, teamwork, leadership, and time-constrained problem solving.
5. Promote ethical, transparent, and responsible use of AI and ML in accordance with AFP values and international norms.

Personnel-in-Charge

Implementing Department: Department of Information Technology

Officer-in-Charge: LTC LUMSIT PROF

Assistant: Mr. Mauri CivHR

Team Composition:

Each company will form one (1) team with eight (8) members composed of at least three (3) First-Class Cadets, three (3) Second-Class Cadets, and two (2) Third-Class Cadets.

Mechanics:

Phase 1: Orientation and Ethics Briefing

- Cadets will be briefed on the scenario and objectives.
- Cadets will use their own laptop with any of the following software and programming tools: Python, R, SQL, Jupyter Notebook, RStudio, Power BI, Tableau, Orange, KNIME (or may use other apps but must seek the approval of the game organizers - DIT).
- Overview of data analytics, AI, and ML expectations.
- Briefing on Responsible AI, data governance, and human-in-the-loop decision making.
- Cadets will be reminded that AI supports decisions, not replaces commanders.

Phase 2: Data Analytics and Model Development

Cadets will check and clean the datasets.

Missing or wrong values will be corrected.

Cadets will create tables and charts to understand the data.

Simple machine learning models will be built to predict readiness.

Model results will be tested using proper performance measures.

Phase 3: AI Interpretation and Decision Support

Cadets will explain what the model results mean.

Possible bias and data limits will be identified.

Results will be translated into clear recommendations.

Focus will be on how leaders can use the results.

Phase 4: Submission and Final Presentation

- Each team shall submit the following:
 - Source code used for data analytics;
 - A technical report explaining methods and results;
 - A command-level slide presentation; and
 - A 10-minute briefing suitable for senior officers.

Additional Guidelines:

1. Datasets
 - Hypothetical data will be provided by the Department of Information Technology to all groups
 - The participants may generate randomized hypothetical datasets as deemed necessary
2. Hardware: Laptop (1 per participant), printer, LED TV
3. Software and Programming Tools: Python, R, SQL, Jupyter Notebook, RStudio, Power BI, Tableau, Orange, KNIME

Scoring:

Criteria	Weight (%)
Mission Relevance	15%
Data Analytics	15%
AI and ML	25%
AI Trust and Ethics	15%
Clear Communication	15%
Presentation and Defense	15%
Total	100%

Defense Systems Innovation Challenge	
Description: The Defense Systems Innovation Challenge is an interdisciplinary competition that requires cadets to conceptualize, design, and develop innovative military systems and technologies that support modern Multi-Domain Operations. Through the application of scientific principles, engineering concepts, and military-oriented problem-solving, cadets are challenged to produce functional prototypes that address contemporary operational requirements in the land, maritime, air, cyber, and information domains. The conduct of this challenge provides cadets with an opportunity to integrate and apply the knowledge and skills acquired from the Department of Natural Sciences courses, particularly Physics with Military Applications I and II (PHY232 and PHY331), Thermodynamics and Fluid Mechanics (ENGG431), Expanded Drawing (ED432), and Science, Technology, and Environmental Studies (STES132). More importantly, it promotes innovation, critical thinking, teamwork, and engineering design while exposing cadets to the practical application of science and technology in military operations.	
Objectives: 1. Demonstrate understanding of defense-weapon systems and military technologies through practical prototype development. 2. Apply scientific and engineering principles in solving military and security-related problems. 3. Integrate concepts from physics, thermodynamics, electronics, communications, environmental science, and engineering design. 4. Develop innovation, creativity, teamwork, and technical communication skills. 5. Promote technology-enabled solutions supporting Multi-Domain Operations.	
Personnel-in-Charge Implementing Department: Department of Natural Sciences Officer-in-Charge: CPT GALINGAN PROF Assistant: P2LT CUESTA PROF	
Team Composition: Each Company shall have three (3) teams composed of six (6) members each, regardless of year level. Each team shall be assigned to a different project category. Multiple entries from the same Company in a single category are not allowed.	
Mechanics: The challenge is to conceptualize, design and build a miniaturized military system that enhances operational effectiveness across the land, air, maritime, cyber, information and multi-domain operations. Each group of cadets may utilize their previous projects as a blueprint for this system.	

Design Categories:

Each team shall select one of the following categories:

Smart Weapon Support System

Examples:

- Smart targeting assistant
- Fire control support system
- Ballistic trajectory calculator
- Weapon status monitoring system

Force Protection and Base Defense System

Examples:

- Intrusion detection network
- Smart perimeter security system
- Electronic surveillance platform
- Counter-drone warning system

Multi-Domain ISR System

Examples:

- Reconnaissance sensor platform
- Maritime monitoring station
- Battlefield environmental monitoring system
- Tactical intelligence gathering device

Logistics and Sustainment System

Examples:

- Smart ammunition inventory tracker
- Fuel and resource monitoring system
- Tactical supply management platform

Disaster Response and Human Security System

Examples:

- Search and rescue locator
- Hazard detection system
- Emergency communication network
- Flood and environmental monitoring device

Technical Requirements:

Arduino-based or equivalent microcontroller platform.

Minimum of three (3) sensors and/or modules.

1. Wireless communication capability.

2. Electronic warfare, electromagnetic sensing, or communication monitoring component.
3. Engineering drawing and system schematic.
4. Fully functional prototype.
5. Operational briefing and demonstration.

Expected Outputs:

1. Functional Prototype
2. Engineering Drawing Package
3. System Schematic Diagram
4. Program Flow Diagram
5. Source Code
6. Technical Documentation
7. Five-Minute Operational Briefing
8. Thirty-Second Military Capability Video

Presentation:

1. Two (2) Members from each group will present their defense system output.
2. Each group will show their 30-second video advertisement.
3. The group will then give a short oral presentation of their system.
4. The presentations should cover the system's functionality, design process, challenges faced, and future improvements.

Scoring:

The overall Company ranking shall be determined using a cumulative scoring system. Points earned by each team in their respective categories shall be added to the total score of their Company. The Company with the highest accumulated score across all categories shall be declared the overall champion.

1. Creativity and Innovation (35%)
 - a. Originality of Application
 - b. Integration of Sensors/Modules
2. Functionality (35%)
 - a. System Operation
 - b. Component Integration
3. Documentation (10%)
 - a. System Description
 - b. Wiring Diagram
 - c. Program Flow Diagram
 - d. Program Code
4. Presentation (10%)
 - a. Clarity and Organization
 - b. Content and Understanding
5. Aesthetics (10%)

SIMEX: Inter-Company Crisis Management Simulation Exercise

Description:

The event is built as an inter-company national security decision simulation: eight company teams operate simultaneously in separate rooms while a centralized exercise directorate releases identical scenario injects through a common Zoom link and manages time, clarifications, and scoring collection. Each room has 2-3 panel observers who score using a common rubric.

The exercise is grounded in Executive Order No. 82, s. 2012, which operationalizes the Practical Guide for National Crisis Managers and the National Crisis Management Core Manual and establishes national and local crisis-management organizations.

Objectives:

1. Evaluate contemporary security challenges using security studies frameworks, critical thinking, and mental agility.
2. Analyze evolving crisis injects to identify threats, actors, assumptions, and second-order effects
3. Differentiate verified information, assumptions, misinformation, and intelligence gaps
4. Evaluate competing courses of action using feasibility, risk, legality, interagency coordination, and escalation-control criteria
5. Justify a whole-of-government response aligned with EO 82 5Ps and PO7 security analysis
6. Formulate an integrated response using DIME+/whole-of-nation logic
7. Create a preliminary after-action assessment identifying gaps and institutional improvements

Personnel-in-Charge

Implementing Department: Department of National Security Studies

Officer-in-Charge: LTC AFAN PROF

Assistant: P2LT RANARIO PROF

Team Composition:

Each company will form one (1) team with seven (7) cadet members. There should be two (2) 1CL; three (3) 2CL, and two (2) 3CL cadets per team.

Mechanics:

- Each team should assign cadets to the following roles: Team Leader, Scribe, Briefer, Risk/Escalation Officer, Interagency/Policy Officer, Information/Cyber Officer and HADR/Resource Officer.
- Teams must complete each decision card within the time set by the central directorate.

- Teams may revise their thinking as new injects arrive, but they may not alter already submitted decision cards unless the directorate authorizes correction of a clerical error.
- The final brief must not exceed 3 minutes. Panels may stop the briefer at the time limit.
- All eight rooms receive identical injects at the same time.
- Panels may explain rules but may not coach or hint at preferred answers.
- Teams may not communicate with other teams during Day 2.
- Internet search, messaging apps, and AI tools are prohibited unless explicitly authorized by the directorate.
- If a technical issue affects one room, the directorate will document the issue and apply the same remedy as far as practicable.
- Panels must score using evidence in the decision cards, final brief, and observed team process, not personal preference for a policy option.
- If panel observers in one room differ by more than 15 points, the Panel Chair and Scoring Lead conduct a quick moderation discussion and document the basis of the final score.
- Before Day 2, all panel observers review the rubric and scoring anchors together.
- The Scoring Lead presents one sample weak response and one sample strong response.
- Panel observers score both samples individually, then compare scores.
- The Scoring Lead clarifies what counts as Excellent, Proficient, Developing, and Weak.
- Panels sign a calibration sheet before the competition begins.

Additional Guidelines:

Multi-Room Competition Architecture

The event is designed as a synchronized eight-room competition. Each company team receives the same scenario injects at the same time. Each room observes the same timing, output templates, and scoring rubric. The central directorate is the only authority that can release injects, answer rule-based clarifications, pause the exercise, or modify time.

Component	Minimum requirement	Purpose
Simulation rooms	8 separate rooms, one per company team.	Prevents cross-team influence and allows focused observation.
Team size	5-7 cadets.	Allows roles such as team leader, analyst, scribe, briefer, interagency planner, risk officer, and communications officer.
Panel observers	2-3 per room.	Scores performance, observes team process, asks final clarification questions, and submits scoring packet.

TV/projector Zoom link	One screen per room connected to central Zoom.	Receives injects, clock, announcements, and directorate instructions simultaneously.
Central directorate/control room	Exercise Director, Deputy Director, Inject Controller, Timekeeper, Zoom Host, Scoring Lead, IT Support.	Controls scenario flow, timing, standard clarifications, contingency release, and scoring collection.
Backup inject envelopes	Sealed printed injects per room, numbered 1-6.	Allows continuity if Zoom fails. Panels open only when directed by central control.
Submission system	Paper templates, QR/form upload, or room runner.	Ensures output collection and time stamping.

Roles and Responsibilities

Role	Core responsibilities
Academic Olympics Directorate	Approves scenario, mechanics, panel assignments, score consolidation, rules, and official results.
Exercise Director	Calls the shots; opens/closes the exercise; releases injects; resolves clarifications; authorizes time extensions or contingency procedures.
Deputy Exercise Director	Supports the Exercise Director, monitors room status, and coordinates with panels.
Inject Controller	Prepares and releases scenario cards, MSEL events, and backup messages.
Central Timekeeper	Maintains official clock, gives 5-minute and 1-minute warnings, and announces transitions.
Zoom Host / IT Lead	Creates central Zoom link, manages screen sharing, monitors audio/video, records only if authorized, and troubleshoots room connections.
Scoring Lead	Collects observer sheets, checks completeness, handles averaging and moderation, and prepares scoring summary.
Room Panel Chair	Controls room protocol, ensures no coaching, manages local Q&A, validates time-stamped outputs, and submits scores.
Panel Observers	Observe team process, score outputs using rubric, write comments, and join calibration/moderation.
Team Leader	Manages team decision cycle, assigns tasks, ensures final recommendation, and keeps discipline under time pressure.
Team Scribe	Completes decision cards and final brief template.
Team Briefer	Delivers the 3-minute final brief and answers panel clarification questions.

Zoom and Control System

A single centralized Zoom link is used as the command broadcast channel. All simulation rooms enter the same Zoom meeting and keep the room TV/projector connected. Rooms should stay muted unless the directorate calls for technical

status checks. The Zoom link is not used for team discussion; team deliberation remains inside each physical room.

Control item	Standard procedure
Pre-event check	Zoom opens at least 30 minutes before Day 2 start. IT confirms room audio, video, screen visibility, and backup envelope location.
Inject release	Directorate screen-shares the inject card and announces: "Inject [number] is now active. You have [minutes] minutes."
Clarifications	Teams submit questions through the room panel. The panel forwards only rules/logistics questions to the directorate. Scenario interpretation questions are not answered.
Backup procedure	If Zoom fails in a room, the panel chair informs IT and waits for directorate SMS/call to open the matching sealed inject envelope.
Official time	Only the central directorate clock is official. Room clocks are advisory.
Communication discipline	Panels do not coach. Directorate does not provide hints. All teams receive identical information unless a technical failure requires controlled re-release.
Recording	Record only if authorized by PMA/DNSS event authorities and announced during Day 1 briefing.

Day 1 Briefing Plan

Recommended duration: 90-120 minutes, depending on whether the panel calibration and Zoom rehearsal are conducted in the same block.

Time	Activity	Lead	Output
0-10 min	Opening, purpose, and Academic Olympics framing.	DNSS / Event Chair	Shared understanding of event purpose.
10-25 min	EO 82, s. 2012 and National Crisis Management 5Ps refresher.	DNSS facilitator	Teams understand Predict, Prevent, Prepare, Perform, and Post-action/Assessment.
25-40 min	PO7 and Revised Bloom's Taxonomy alignment.	DNSS facilitator	Teams understand that scoring favors analysis, evaluation, justification, and creation.
40-55 min	Competition mechanics, room rules, output templates, and prohibited assistance.	Exercise Director	Common rules across all teams.
55-70 min	National policy and interagency function crosswalk: EO82, NSP/EO37, NCSP/EO58, RA10121/NDRRMP/NDRP,	DNSS facilitator / Exercise Director	Teams know that answers must be institutionally realistic, not merely tactically clever.

	and C-OPR/lead-agency logic.		
70-90 min	Team role assignment and quick practice decision card.	Room panels / teams	Teams ready to operate under time pressure.
Separate 30 min	Panel observer calibration using sample responses.	Scoring Lead	Panels apply scoring anchors consistently.
Separate 20 min	Room/TV/Zoom technical rehearsal.	Zoom Host / IT Lead	Confirmed central broadcast system.

Day 1 briefing message for cadets

You are not being tested on memorizing facts. You are being assessed on how well your team can analyze an evolving security problem, evaluate options under uncertainty, and justify a disciplined whole-of-government response. The strongest teams will not be the loudest or fastest; they will be the teams that frame the problem correctly, identify risks honestly, use EO 82's 5Ps intelligently, and brief a feasible recommendation.

Day 2 Two-Hour Simulation Exercise Plan

Time	Central directorate action	Team action	Panel action
0-5 min	Open Zoom, confirm 8 rooms, announce rules and official clock.	Confirm roles and materials.	Confirm scoring sheets and room integrity.
5-17 min	Release Inject 1: Strategic warning.	Analyze weak signals and complete Decision Card 1.	Observe problem framing and team process.
17-29 min	Release Inject 2: Information disorder.	Evaluate credibility and formulate prevention/communication response.	Score Decision Card 1; observe Decision Card 2.
29-41 min	Release Inject 3: Cyber disruption.	Prepare/perform continuity and cyber governance response.	Score Decision Card 2; observe Decision Card 3.
41-55 min	Release Inject 4: Maritime incident.	Evaluate COAs and justify escalation-controlled response.	Score Decision Card 3; observe Decision Card 4.
55-69 min	Release Inject 5: Domestic disaster overlay.	Prioritize limited resources and coordinate HADR/security response.	Score Decision Card 4; observe Decision Card 5.
69-83 min	Release Inject 6: Consolidated national decision requirement.	Create integrated final recommendation and preliminary AAR points.	Score Decision Card 5; observe Decision Card 6.
83-100 min	Announce final brief preparation period.	Prepare 3-minute final NSC/National Crisis Manager brief.	Score Decision Card 6; prepare final brief rubric.

100-112 min	Announce final brief window and one-minute warning.	Deliver 3-minute final brief inside room. Panel may ask one clarification question.	Score final brief and team process.
112-120 min	Announce end exercise, collect packets, and secure scores.	Submit all templates and stop discussion.	Finalize scoring sheets, sign, and submit to directorate.

The exact minute allocation may be adjusted by the Exercise Director, but all eight teams must receive identical time and identical injects.

Day 3 Debrief and After-Action Learning Plan

Day 3 should not merely announce winners. It should complete the learning loop required by EO 82's Post-action and Assessment phase. The debrief converts competition performance into DNSS learning about crisis-management judgment, interagency coordination, and national security analysis.

Time	Activity	Purpose
0-10 min	Opening and ground rules for learning debrief.	Set constructive tone; avoid blaming teams or panels.
10-25 min	Directorate summary of common strengths and recurring gaps.	Identify patterns across all eight rooms.
25-45 min	Panel observations by theme: analysis, EO82 5P use, coordination, risk, communication.	Give evidence-based feedback.
45-65 min	Team reflection worksheet and selected company sharing.	Allow cadets to analyze their own decision process.
65-80 min	After-action synthesis: what DNSS should institutionalize for future Academic Olympics.	Create improvement recommendations.
80-90 min	Announcement/validation of results and closing.	Close the assessment and learning cycle.

Scoring:

Component	Points	Scoring description
Six scenario decision cards	60	10 points per inject. Teams are scored on problem framing, EO82 5P alignment, applicable national policy/plan awareness, COA/interagency logic, and risk/communication discipline.
Final NSC-style brief	25	Assesses strategic synthesis, feasibility, EO82/DIME+ and national-policy integration, lead/support agency realism, risk and escalation management, and clarity under time pressure.
Team process and time discipline	15	Assesses role execution, collaboration, listening, decision discipline, adaptability, and compliance with time limits.

Total	100	Final team score is the average of panel observer scores, subject to directorate completeness check and moderation rules.
-------	-----	---

Ten-point decision-card rubric for each inject

Criterion	Points	Excellent evidence
Problem framing and analysis	3	Correctly identifies the core problem, relevant actors, assumptions, and second-order effects.
EO82 5P and policy/plan alignment	2	Uses the correct crisis-management phase and identifies the applicable policy, plan, C-OPR, lead agency, or interagency function.
COA and interagency logic	3	Provides feasible actions, lead/support agencies, coordination mechanism, decision level, and clear prioritization.
Risk, communication, and restraint	2	Anticipates risks, avoids premature escalation or attribution, and gives a disciplined communication line.

Final NSC-style brief rubric

Criterion	Points	Excellent evidence
Strategic synthesis	7	Integrates all injects into one coherent national security problem and identifies what matters most.
EO82 and whole-of-government integration	6	Uses 5Ps and clear interagency roles; connects security, communication, HADR, cyber, diplomatic, and maritime dimensions.
Feasibility and prioritization	5	Recommends actions that are realistic, sequenced, and matched to available authorities and resources.
Risk and escalation management	4	Identifies likely consequences, mitigations, and decision points.
Clarity and time discipline	3	Brief is concise, persuasive, structured, and within 3 minutes.

Team process rubric

Criterion	Points	Excellent evidence
Role execution	5	Team leader, scribe, briefer, and analysts perform clear functions without confusion.
Collaboration and listening	5	Members contribute, challenge assumptions respectfully, and integrate diverse inputs.

Decision discipline and adaptability	5	Team converges on timely decisions, adapts to new injects, and avoids paralysis.
--------------------------------------	---	--

Four-level scoring anchors

Level	Descriptor	Meaning for panels
4 – Excellent	Integrated, evidence-based, feasible, and strategically mature.	Would be defensible before a senior crisis-management body.
3 – Proficient	Mostly correct and workable, with minor gaps.	Adequate for the scenario but needs clearer prioritization or risk treatment.
2 – Developing	Partial answer that misses important links, risks, agencies, or trade-offs.	Shows effort but remains incomplete or too generic.
1 – Weak	Reactive, vague, unsupported, tactically narrow, or misaligned.	Would likely worsen confusion, risk, or coordination problems.

Academic Mustering: Military Undergraduate Symposium for Transformative Engagement in Research

Description:

Academic Muster is the culminating research competition of the Headquarters Academic Group, Philippine Military Academy. It challenges cadet companies to conduct original research, communicate their findings through multiple formats, and defend their work before a panel of evaluators. It is designed to develop the soldier-scholar: an officer who thinks rigorously, writes precisely, and communicates with confidence.

Thematic Areas:

1. Multi-Domain Warfare Capabilities and Emerging Technologies

Artificial Intelligence

Unmanned Aerial System/Drones Technology

Cybersecurity and Information Space

Cognitive Warfare and Information Operations

2. International Defense and Strategic Environment

International Defense and Security Engagements

Regional and Great Power Competition

Intelligence and Counter-Intelligence

External Defense and Maritime Affairs

3. Non-Traditional Security Threats and Community Resilience

Human Security

Humanitarian Assistance and Disaster Resilience

Societal Security and Community Development

Civil-Military Operation

4. Organizational Reforms and Institutional Management
Crisis Management and Good Governance
Defense and Military Policy Reforms
Defense Modernization
Human Capital and Resource Management

Objectives:

1. Develop competence in critical thinking, analytical reasoning, problem-solving, and scientific writing through the conduct and documentation of original research.
2. Demonstrate the ability to apply IMRAD-structured research methodology to real-world security, defense, governance, and institutional management challenges.
3. Cultivate confidence, professionalism, and intellectual discipline in communicating and defending research findings before a panel of evaluators.
4. Promote evidence-based decision-making and the formulation of feasible, relevant, and sustainable recommendations that contribute to academic, institutional, or national advancement.

Personnel-in-Charge

Implementing Department: Department of Management
Officer-in-Charge: LTC PUBLICO PROF
Assistant: P2LT SUYU PROF

Team Composition:

Each company will form one (1) team with 10 members composed of four (4) First-Class Cadets, four (4) Second-Class Cadets, and two (2) Third-Class Cadets.

Mechanics:

Event 1: The Brief (Research Paper Competition)

- Each of the eight (8) cadet companies shall produce one (1) original research paper.
- Research begins in August and concludes in December of the same academic year.
- Papers follow IMRAD journal format: maximum of 25 pages, double-spaced, 12pt Times New Roman, 1-inch margins, APA 7th Edition.
- Each paper must align with one (1) of the four (4) prescribed thematic areas.
- Completed papers are submitted to the Committee by the first week of December for blind review.

Contents of the Research:

- Title and Abstract
 - Title: concise, specific, maximum of 15 words.
 - Abstract: 250 words maximum, structured (Background, Methods, Results, Conclusions). Keywords: Five (5) to seven (7) terms.

- Introduction
 - Background and context of the problem. Review of Related Literature. Conceptual or Theoretical Framework. Research objectives and questions. (1,500 to 2,000 words)
- Methods/Methodology
 - Research design and approach. Population, sample, and sampling method. Data collection instruments and procedures. Statistical or analytical treatment. Ethical considerations. (800 to 1,200 words)
- Results
 - Presentation of findings only, without interpretation. Use of tables and figures where appropriate (maximum five (5) each). Objective and factual reporting. (1,500 to 2,000 words)
- Discussion
 - Interpretation and analysis of results. Connections to existing literature. Study limitations and recommendations for future research. (1,200 to 1,800 words)
- Conclusion and References
 - Synthesis of the study's key contributions and operational or institutional implications (300 to 500 words). Full reference list in APA 7th Edition.

Event 2: The Battle Board (Research Poster Competition)

- Poster dimensions: 36" x 48" (portrait), printed on tarpaulin or foam board.
- Font must be readable at three (3) feet distance; minimum 24pt body text.
- Each company submits one (1) poster for the selected topic.
- Posters are mounted during the Academic Olympics Culminating Week.
- Each team is allotted 10 minutes for presentation and 10 minutes for Question and Answer.
- All team members must be present during evaluation.
- Poster content must be consistent with the submitted research paper.

Required Poster Components:

- Title, Authors, and Company
- Abstract (100 words maximum)
- Background and Problem Statement
- Research Objectives
- Methodology (Brief)
- Key Results and Findings
- Discussion and Analysis
- Conclusions
- Recommendations
- Strategic and Operational Implications

Event 3: The Intel Report (Research Video Presentation Competition)

- Duration: Five (5) to eight (8) minutes (hard cut-off at eight [8] minutes).
- Format: MP4, minimum 1080p resolution.
- Must include narration or voice-over throughout.
- On-screen text must be legible; minimum 24pt equivalent.
- May include interviews, field footage, animations, and data visualization.
- Background music is optional; narration must remain dominant.
- Opening title card must show: Company name, Research title, Thematic area, Academic year.
- Closing credits must acknowledge all members and the faculty advisers.

Required Content Flow:

- Opening (0:00 to 0:30) - Title card, company identification, and brief statement of the research problem.
- Background(0:30 to 1:30) - Context and significance of the study. Why this topic matters now.
- Methodology(1:30 to 2:30) - Brief explanation of how the research was conducted. Design, participants, and approach.
- Findings (2:30 to 5:00) - Key results presented through data visuals, narrative, and analysis.
- Conclusions (5:00 to 7:00) - Interpretation of findings and their strategic or operational implications.
- Closing (7:00 to 8:00) - Recommendations and call to action. Closing credits.

Additional Guidelines:

1. Academic Adviser of each company will serve as their research adviser.
2. Blind reviewers (8 personnel) will be invited from nearby universities.
3. The panel of evaluators for The Battle Board (5 personnel) and for the Intel Report (5 personnel) will come from the Headquarters Academic Group Special Orders Number 14 dated 01 June 2026.
4. Each event is scored independently by a separate panel of evaluators. After all three(3) events are concluded, scores from The Brief, The Battle Board, and The Intel Report are combined. The cadet company with the highest combined score across all three (3) events is declared the Academic Muster Champion.
5. In the event of a tie in combined score, the company with the higher score in The Brief shall prevail.

Scoring:

The Brief

Evaluation Criteria:

1. Research Problem and Significance (20 points)

Research problem is clearly defined, relevant, and supported by appropriate context. The study establishes the importance of the research and demonstrates its contribution to addressing a specific issue or knowledge gap.

2. Quality of Methodology (20 points)

Research design, methods, and procedures are appropriate, clearly explained, and aligned with the research objectives. Data collection and analysis processes are systematic, credible, and sufficient to support the study.

3. Results and Analysis (20 points)

Research findings are accurately presented and effectively analyzed. Results are supported by appropriate evidence, with clear interpretation and logical connections to the research questions and objectives.

4. Discussion and Recommendations (20 points)

Discussion demonstrates critical understanding of the findings and relates them to relevant concepts, theories, or existing studies. Recommendations are practical, evidence-based, and aligned with the identified issues and results.

5. Adherence to IMRAD Format and APA Citation (10 points)

Research paper follows a logical and well-organized IMRAD structure, with each section appropriately developed and interconnected. Citations, references, and formatting are accurately applied based on APA guidelines.

6. Clarity of Writing and Academic Tone (10 points)

Content is written clearly, logically, and professionally using an appropriate academic tone. Ideas are well-organized, transitions are effective, and language demonstrates accuracy, coherence, and scholarly presentation.

The Battle Board

1. Content Accuracy and Research Fidelity (20 points)

Poster content accurately reflects the research paper's findings, methodology, and conclusions. No unsupported claims or omissions of key results.

2. Visual Design and Communication Clarity (20 points)

Information is presented in a clear, organized, and visually engaging layout. Appropriate use of text, figures, charts, and white space. Readable at 3 feet.

3. Scientific Rigor and Logical Flow (20 points)

Components follow a logical sequence from problem to conclusion. IMRAD structure is evident even in poster form. Data is presented accurately.

4. Oral Presentation and Communication Skills (20 points)

Team explains the study clearly, confidently, and professionally. Subject matter

command is demonstrated. Engagement with evaluators is effective.

5. Response to Questions and Defense (20 points)

Team demonstrates mastery in responding to evaluator questions. Responses are sound, adaptable, and reflect genuine understanding of the research.

The Intel Report

1. Research Content and Accuracy (20 points)

Video accurately represents the paper's research problem, methodology, findings, and conclusions without distortion or omission of key information.

2. Narrative Quality and Logical Flow (20 points)

The video tells a coherent, logical research story from problem to conclusion. Transitions are clear. The viewer can follow the argument without the written paper.

3. Production Quality (20 points)

Clarity of audio and video. Quality of on-screen text, graphics, and data visualization. Overall professional finish appropriate to an academic presentation.

4. Strategic Relevance and Operational Impact (20 points)

The video communicates why the research matters in the context of defense, security, governance, or institutional management. Recommendations are clearly articulated.

5. Creativity and Effective Use of the Medium (20 points)

The team uses the video format creatively and deliberately. Visual storytelling adds value beyond what text alone could convey. Not simply a narrated slide deck.

Over-all Scoring:

Event	Format	Maximum Score
The Brief	Research Paper (IMRAD)	100
The Battle Board	Research Poster + Defense	100
The Intel Report	Research Video	100

Advocacy Film

Description:

It is a group-based creative and effective messaging competition designed to develop participants' communication skills, critical thinking, teamwork, and artistic expression through visual storytelling. The event challenges teams to conceptualize, produce, and present a short film that reflects a given theme aligned with academic values, leadership, ethics, nationalism, and socially relevant issues.

The competition encourages participants to translate ideas and research into compelling narratives that inspire awareness, reflection, and positive action. Through film, participants are given a platform to creatively express advocacies while demonstrating discipline, innovation, and collaborative leadership under time constraints.

By integrating language, communication, research, creativity, and media literacy, the Advocacy Film event promotes interdisciplinary learning and strengthens participants' ability to convey impactful messages responsibly and effectively. Ultimately, this activity underscores the power of storytelling as a tool for education, advocacy, and nation-building.

Objectives:

1. Analyze how information, technology, narratives, and public perception influence modern security operations.
2. Design an ethical communication product that promotes resilience, civic responsibility, and national security awareness demonstrating strategic communication skills and effective messaging critical in Cognitive Warfare.
3. Demonstrate interdisciplinary learning by integrating language, communication, research, creativity, and media literacy, while encouraging participants to convey meaningful messages within a limited time frame.
4. Showcase innovation, discipline, and collaborative leadership under time constraints.

Personnel-in-Charge

Implementing Department: Department of Humanities

Officer-in-Charge: LTC JABAGAT PROF

Assistant: P2LT BARANDA PROF

Team Composition:

Each company will form one (1) team with ten (10) members regardless of rank or class.

Mechanics:

- Each team shall produce one original advocacy film based on the official theme announced by the committee.

- The short film must have a maximum duration of four (4) to five (5) minutes, including opening and closing credits.
- All entries must be original, unpublished, and created solely for the Acad Olympics.
- Dialogues may be in English, Filipino, or mixed, but English subtitles are required for clarity and uniformity.
- The film must be appropriate for all audiences and must not contain offensive, discriminatory, or politically partisan content.
- Teams must submit their short film in the prescribed format and deadline set by the committee.
- Late submissions shall be subject to penalties or disqualification.
- The decision of the Board of Judges shall be final and binding.

Scoring:

Criteria	Weight (%)
Relevance to the Theme and Message Clarity	30%
Storyline and Script (structure, coherence, impact)	25%
Creativity and Originality	20%
Technical Quality (cinematography, editing, sound, lighting)	15%
Teamwork and Overall Presentation	10%
Total	100%

Position Paper Challenge

Description:

Cadets will prepare a position paper based on a given contemporary issue or operational scenario, with the writing process conducted in phases over one week. Each phase will assess the participants' ability to develop a clear stance, support arguments with credible evidence, and present logical reasoning. The contest emphasizes critical thinking, research, analytical writing, and the effective communication of policy recommendations.

Objectives:

1. To develop cadets' ability to analyze complex issues and formulate a well-supported position on contemporary security and national concerns.
2. To enhance cadets' research, critical thinking, and academic writing skills through a structured, phase-by-phase writing process.

3. To strengthen cadets' capacity to communicate persuasive, evidence-based arguments and recommendations in a professional written format.

Personnel-in-Charge

Implementing Department: Department of Humanities

Officer-in-Charge: CPT CAPINPIN PROF

Assistant: CPT DE GUZMAN PROF

Team Composition:

Each Company shall form a team with eight (8) representatives to participate in the competition, regardless of cadet class from 1CL to 3CL.

Mechanics:

- Participants shall be assigned or shall draw a contemporary security issue from the approved list of topics, which may include the West Philippine Sea, terrorism, cyber threats, energy security, gray-zone operations, disaster response and management, and other relevant security concerns.
- The position paper shall present a concise analysis of the issue, incorporating relevant social, political, economic, cultural, historical, and operational factors.
- The position paper shall demonstrate the application of ethical reasoning and security studies concepts in analyzing the selected security issue.
- Participants shall complete the position paper within the time allotted by the Organizing Committee.
- All submissions shall be written in clear, concise, and professional military writing style and must adhere to the prescribed memorandum format.
- All entries must be the original work of the participant. Any form of plagiarism, unauthorized collaboration, or other academic dishonesty shall be grounds for disqualification.
- Entries shall be evaluated based on the prescribed criteria, including issue analysis, application of security studies concepts, ethical reasoning, quality and feasibility of recommendations, organization, clarity, and writing mechanics.
- The decisions of the Board of Judges and the Organizing Committee shall be final and irrevocable.

Scoring:

Criteria	Description	Weight (%)
Analysis of Security Issue	Demonstrates a clear understanding of the assigned security issue and accurately identifies key challenges, threats, and implications.	30%
Application of Security Studies Concepts and Ethical Reasoning	Effectively applies relevant security studies concepts, frameworks, and ethical considerations in the analysis of the issue.	25%

Quality and Feasibility of Recommendations	Provides clear, evidence-based, practical, and commander-relevant recommendations that address the identified security issue.	25%
Organization and Clarity of Writing	Presents ideas logically and coherently using an appropriate memorandum format and professional military writing style.	10%
Grammar, Mechanics, and Professional Presentation	Demonstrates proper grammar, spelling, punctuation, formatting, and adherence to memorandum standards.	10%
Total		100%

Magsaysay Cup: Debate Open

Description:

It is a team event in Asian Parliamentary format that would test the effective communication, persuasion, argumentation, and critical thinking of the Cadets. The debate motions for the competition will revolve around national security, governance, law, human security, international relations, development-security, military modernization, ethical use of modern weapon systems, and external defense.

Objective:

1. Showcase the effective communication, persuasion, argumentation, and critical thinking of the Cadets.

Personnel-in-Charge

Implementing Department: Department of Humanities

Officer-in-Charge: Dr. Lozano

Assistant: CPT BORJA PROF

Team Composition:

Each Company shall have one team composed of three members and one (1) adjudicator (N -1 rule). One member shall be a 1CL cadet. The company has the prerogative to decide on the composition of their team.

Members of the CCAFP's Discussion and Debate Society (DSS) are not allowed to join as participants. They shall augment in the facilitation, adjudication, and coordination of the debate matches.

Mechanics:

- The debate format will be in Asian Parliamentary. There will be two opposing sides:
 - Government side – proposes and defends the motion

- Opposition side – refute and negates the motion
- The members of the government side are the following:
 - Prime Minister (PM) – opens the debate, defines the motion and advances arguments
 - Deputy Prime Minister (DPM) – refute at first instance the case of the opposition, reestablish the government's claim, and advances arguments
 - Government Whip (GW) – makes an issue-based rebuttal of the opposition's case and summarizes the case of the government.
- The members of the opposition side are the following:
 - Leader of the Opposition (LO)- responds directly to the case of the government by giving a direct clash, and advances arguments. May challenge the motion if the definition is challengeable
 - Deputy Leader of the Opposition (DPL) – refutes the case of the DPM, reestablishes the case of the opposition, and advances an argument
 - Opposition Whip (OW) – makes an issues-based rebuttal of the government's and summarizes the case of the opposition.
- Each speaker is allocated seven minutes to deliver their constructive speeches. One speaker from each side (For the Government: PM/DPM, for Opposition: LO/DLO) is given four minutes to deliver a reply speech. The speakers will be speaking in the following order:
 - 1) Prime Minister
 - 2) Leader of the opposition
 - 3) Deputy Prime Minister
 - 4) Deputy Leader of the Opposition
 - 5) Government Whip
 - 6) Opposition Whip
 - 7) Opposition Reply
 - 8) Government Reply
- During the constructive speeches, Point of Information (POI) may be raised by the opposing side after the first minute up to the sixth minute. POI may be refused or accepted by the speaker. During reply speeches, no POI may be raised.
- For the reply speech, each team is given four minutes to deliver the speech. Reply speech is a comparative analysis of the strength and weaknesses of the case of both sides. The aim of the speech is to give a bias judgment as to why should the people support the team's claim. The speech is first delivered by the opposition side and followed by the government side who will close the debate.
- All debate teams must send one adjudicator in the competition (N-1 rule). In the elimination rounds, no adjudicator will be allocated to judge their respective companies. External adjudicators will likewise be invited to supplement the adjudication process. At the end of every round, each adjudicator shall convene, cast their votes, and determine the winner of the round. No discussions among the adjudicators will be allowed. After the debate, each adjudicator shall be given 3-5 minutes to discuss his/her decision to the debaters and how the decision was made.

The adjudicators will evaluate and grade the arguments, clashes, rebuttals, delivery, and overall quality of debate using the rubric that will be provided. From their adjudication, the winning team will be determined as well as the best speaker. The best speaker may not come from the winning team.

- The adjudicators will be graded by the debating teams based on the decision and justification provided by the adjudicator during the oral adjudication. On the other hand, the speakers will be given individual scores by the adjudicators to be submitted to the tabulation team.
- In keeping with the Asian Parliamentary Format, the winner of the debate matches will be determined through the quality of their Matter, Manner, and Method.

Speaker Roles:

Government:

Prime Minister (PM):

- Define context and parameters of debate. For example, in an open motion like “This House Would Support Musicians”, the debate could be contextualized into whether music should be a commodity for trade, or it should be available gratis (i.e. free music download and transfer)
- Provide concise background or history leading to the issue
- Give framework of government bench’s case. I.e. mechanisms (if any), argumentation flow (what the government’s first argument is and what the Deputy Prime Minister will talk about)
- Introduce 1st argument
- Assert Government stand

Deputy Prime Minister (DPM):

- Rebut first argument from Leader of Opposition
- Rebut rebuttals to PM’s argument
- Introduce 2nd and 3rd argument
- Reassert Government stand and case

Government Whip

- Rebut Deputy Leader of Opposition, and Leader of Opposition
- Rebut rebuttals to DPM and PM arguments
- Provide a deeper level of analysis for previous arguments and rebuttals
- No new arguments, but new angles of arguments should be given
- Brief summary of entire case of Government

- Reassert Government stand and case

Opposition:

Leader of Opposition:

- Agree or disagree with context/ parameters of debate (any definitional challenges, accusations of squirreling, or unfair set up should be made from the LO speech and no later)
- Rebut Prime Minister's argument
- Give framework for Opposition case (if Opp agrees to problem, then their case should provide solution, or at least effectively highlight how Government proposal will worsen the situation)
- Introduce first Opposition argument
- Assert Opposition stand

Deputy Leader of Opposition:

- Rebut DPM and PM arguments
- Rebut rebuttals to LO arguments
- Introduce 1st and 2nd (if any) arguments
- Reassert Opposition stand and case

Opposition Whip

- Rebut DPM and PM arguments
- Rebut rebuttals to LO & DLO arguments
- Provide a deeper level of analysis for previous arguments and rebuttals
- No new arguments, but new angles of arguments should be given
- Reassert Opposition stand and case

Reply Speech:

- Can only be done by either 1st or 2nd speaker from each bench
- Provide a biased 'oral adjudication' of why the debate should go to own bench
- Highlight issues you think your side won, carefully tiptoe around issues you think you lost
- New examples to expand on discussed examples is usually allowed and makes the reply speech sound fresh as opposed to verbal regurgitation
- Reassert stand

Additional Guidelines:

Elimination Rounds

1. There will be two rounds in the elimination round. After the third round, four teams with the highest points will be eligible to break and subsequently proceed to the Semi-Finals. In case of a tie, the team with the higher combined speaker scores will then be the one eligible to break.

2. The winners of the Semi-Finals will proceed to the Debate Grand Finals, and subsequently the winner of the Debate Grand Finals shall be held the 2026 CCAFP Inter-company Debate Champion and shall be given the “Magsaysay Cup”.

3. For the adjudicators, the top 4 adjudicators based on scores will advance to judge in the semi-finals and grandfinals. The top adjudicator will be awarded.

Scoring:

Debaters:

After the round, each adjudicator shall fill up the score sheet for each debater. The winner of the round must always be the team with the higher combined speaker scores.

Table 1. Speaker Scores

Score	Description
69-71	Poor
72-74	Below Average
75-77	Average
78-80	Above Average
81-83	Excellent

Further description of the speaker scores shall be discussed in the orientation.

Adjudicators:

After giving his/her oral adjudication or after discussing his/her justification to the result of the round to the debaters, each team shall rate the adjudicators based from the Judge Scores.

Table 2. Judge Scores

Score	Description
1	Poor
2	Below Average
3	Average
4	Above Average
5	Excellent

Language Proficiency Contest

Description:

The English Proficiency Challenge is an academic competition that promotes the development and enhancement of English language skills among participants. As English remains a vital medium for communication, leadership, education, and professional engagement, proficiency in the language is essential for success in both academic and operational environments. Through this challenge, participants are encouraged to demonstrate their competence in reading comprehension, listening comprehension, vocabulary, grammar, and overall language proficiency.

The activity fosters critical thinking, effective communication, analytical reasoning, and confidence in using English in various contexts. It also cultivates a culture of academic excellence, continuous learning, and healthy competition while providing participants with an opportunity to assess their strengths and identify areas for improvement. Ultimately, the challenge contributes to the development of well-rounded individuals who are better prepared to communicate effectively, lead confidently, and perform successfully in diverse professional and multicultural settings.

Objectives:

1. Enhance the English language proficiency of participants in the areas of reading, listening, vocabulary, grammar, and communication.
2. Develop participants' critical thinking, comprehension, and analytical skills through the application of English language competencies.
3. Promote academic excellence and continuous learning by encouraging participants to improve their English proficiency.
4. Foster healthy competition and a culture of effective communication among participants through a structured English proficiency assessment.

Personnel-in-Charge

Implementing Department: Department of Humanities

Officer-in-Charge: P2LT BARANDA PROF

Assistant: Dr. Berong

Team Composition:

Each company shall select ten (10) representative from each cadet class: 3CL, 2CL, and 1CL.

Each company shall therefore have a total of thirty (30) representatives competing in the challenge.

Mechanics:

- All representatives shall take the English Proficiency Test on the scheduled date and time designated by the organizers.
- Representatives shall compete against participants belonging to the same cadet class.
- The official score obtained by each representative shall be used for the competition.
- The company score shall be determined by computing the average of the English Proficiency scores of its forty (40) representatives.
- The company with the highest average score shall be declared the Champion of the English Proficiency Challenge.
- In case of a tie, the company with the highest individual score among its representatives shall be declared the winner.
- If the tie persists, the company with the highest combined score of its 1st Class and 2nd Class representatives shall be declared the winner.
- All participants must complete the test independently and in accordance with the rules and procedures prescribed by the organizers.
- Any participant found cheating, receiving unauthorized assistance, or violating testing procedures shall be disqualified.
- The decisions of the Board of Judges and the Organizing Committee shall be final and irrevocable.

Scoring:

Average: $\text{Company Final Score} = (\text{4th Class Score} + \text{3rd Class Score} + \text{2nd Class Score} + \text{1st Class Score}) \div 4$

Tie-Breaking Rules

Order	Basis
1st Tie-Breaker	Highest Individual Score among the Company Representatives
2nd Tie-Breaker	Highest Combined Score of the 1st Class and 2nd Class Representatives
Final Tie-Breaker	Decision of the Organizing Committee

Company Mural	
Description:	The Company Mural Competition is focused on creative thinking and artistic expression that leads toward civic engagement, education and advocacy demonstration
Objective:	1. Promote creativity, teamwork, and artistic expression while reinforcing the Academy's core values, heritage, and mission through visual art.
Personnel-in-Charge	Implementing Department: Department of Humanities Officer-in-Charge: MAJ GONZALES PROF Assistant: P2LT BARANDA PROF
Team Composition:	Each Company shall field one (1) team composed of fifteen (15) cadets, regardless of class to participate in the contest.
Mechanics:	• The mural shall be an original work and must not infringe upon any copyright or intellectual property rights. • AI-generated images, copied artworks, or previously published designs are strictly prohibited. • The mural must prominently embody the contest theme and uphold the ideals, traditions, and values of the Philippine Military Academy. • The mural shall not contain offensive, discriminatory, political, commercial, or inappropriate content. • The mural shall be created only within the designated wall or area assigned by the organizing committee. • Only paints and materials approved by the organizers may be used. • Participants shall observe proper safety measures and maintain cleanliness in their assigned work area throughout the duration of the contest. • No work shall be done before the official start or after the official end of the contest period. • The organizing committee reserves the right to disqualify any entry that violates these mechanics or is found to have received unauthorized assistance.

Scoring:

Criteria	Weight	Excellent	Very Good	Good	Fair	Score
Creativity & Originality	20%	Exceptionally creative, innovative, and original concept that stands out. (18–20)	Creative with minor similarities to existing ideas. (15–17)	Some originality evident but relies on familiar concepts. (12–14)	Limited creativity and originality. (0–11)	
Visual Impact	20%	Highly attractive and immediately captures attention; excellent aesthetic appeal. (18–20)	Visually appealing with only minor weaknesses. (15–17)	Moderately attractive and engaging. (12–14)	Weak visual appeal and presentation. (0–11)	
Relevance to Theme	20%	Theme is exceptionally clear, meaningful, and consistently reflected throughout the mural. (18–20)	Theme is clearly represented with minor inconsistencies. (15–17)	Theme is recognizable but lacks depth. (12–14)	Theme is weakly represented or unclear. (0–11)	
Composition & Layout	15%	Excellent arrangement, balance, proportion, and effective use of space. (14–15)	Well-organized with minor layout issues. (12–13)	Adequate organization and balance. (10–11)	Poor arrangement and ineffective use of space. (0–9)	
Color & Typography	15%	Outstanding color harmony; typography is clear, readable, and enhances the overall design. (14–15)	Effective use of color and readable typography. (12–13)	Acceptable color combinations and typography. (10–11)	Poor color selection and/or typography affects readability. (0–9)	
Technical Quality	10%	Excellent craftsmanship	Good workmanship	Acceptable technical	Poor workmanship	

		p, neatness, precision, and overall finish. (9–10)	with minor imperfections. (7–8)	execution. (5–6)	p and finish. (0–4)

Mathenik: Mathematical Excellence and Knowledge Challenge

Description:

MATHENIK is a mathematics competition designed to develop and showcase cadets' mathematical knowledge, analytical thinking, teamwork, and problem-solving skills. The activity brings together cadets from different class levels to compete as a company team, with each member contributing knowledge and skills acquired from their respective mathematics courses.

Through a series of timed rounds, participants will apply mathematical concepts, logical reasoning, and collaborative decision-making in solving problems of varying difficulty. The competition promotes academic excellence, healthy competition, teamwork, and intellectual growth among future military leaders. Success in the competition depends not only on individual mathematical ability but also on the team's capacity to communicate effectively, share ideas, and arrive at sound decisions under pressure.

Objectives:

1. Demonstrate mastery of mathematical concepts across different disciplines.
2. Apply analytical and logical reasoning in solving problems under time constraints.
3. Promote academic excellence and intellectual competitiveness among cadets.
4. Develop confidence, discipline, and resilience through mathematical challenges.
5. Strengthen teamwork, communication, and collaborative problem-solving among company representatives.
6. Foster cooperation among cadets from different class levels through shared mathematical decision-making.

Personnel-in-Charge:

Implementing Department: Department of Mathematics

Officer-in-Charge: MAJ AJAN PROF

Assistant: P2LT FERNANDEZ PROF

Team Composition:

Each Company shall field a total of five (5) teams throughout the competition, with one team participating in each round composed of:

- One (1) First Class Cadet
- One (1) Second Class Cadet
- One (1) Third Class Cadet

The three cadets shall compete as a single team and are expected to collaborate in analyzing problems, discussing solutions, and making decisions during each round.

Mechanics:

- All questions shall be answered by the team as a group.
- Team members may discuss and work collaboratively within the allotted time before submitting an answer.
- Only one final answer shall be submitted for each question.
- Teams are encouraged to maximize the strengths and mathematical knowledge of each member.
- The competition emphasizes collective problem-solving; therefore, success shall depend on the team's ability to communicate, coordinate, and make sound decisions under time pressure.

Competition Format

The competition shall consist of five (5) rounds. Each round shall contain ten (10) questions classified as Easy, Average, and Difficult.

Question Distribution Per Round

Category	Number of Questions	Time Limit
Easy	4	20 seconds
Average	3	30 seconds
Difficult	3	1 minute
Total	10	—

Question Types

1. Easy Questions
 - a. Four (4) multiple-choice questions.
 - b. Cover fundamental concepts in Algebra, Trigonometry, Analytic Geometry, and Differential Calculus.
 - c. Teams shall select the correct answer from the given choices.
 - d. Twenty (20) seconds shall be allotted for each question.
2. Average Questions
 - a. Three (3) identification questions.
 - b. Require direct computation or analysis.
 - c. Teams shall write the exact answer on the provided answer board.
 - d. Thirty (30) seconds shall be allotted for each question.
3. Difficult Questions
 - a. Three (3) word problems.
 - b. Problems may involve military, operational, leadership, logistics, navigation, resource management, or decision-making scenarios.
 - c. Teams shall solve the problem and provide the final answer.
 - d. One (1) minute shall be allotted for each question.

Additional Guidelines:

1. Scores from all five (5) rounds shall be accumulated.
2. The team with the highest total score shall be declared Champion.
3. The team with the second-highest total score shall be declared First Runner-Up.
4. The team with the third-highest total score shall be declared Second Runner-Up.
5. In case of a tie, tie-breaker questions shall be administered until a winner is determined.

The activity is designed to be completed within approximately two (2) hours, including:

- Opening briefing
- Five competition rounds
- Score validation
- Awarding ceremony.

Scoring:

Points per Question

Category	Points	
	Round 1 to 4	Round 5
Easy	1 Point	2
Average	2 Points	3
Difficult	3 Points	5

Maximum Points for Round 1 to 4

Category	Questions	Points per Question	Maximum Points
Easy	4	1	4
Average	3	2	6
Difficult	3	3	9
Total	10	—	19 Points

Maximum Points for Round 5

Category	Questions	Points per Question	Maximum Points
Easy	4	2	8
Average	3	3	9
Difficult	3	5	15
Total	10	—	32 Points

Maximum Competition Score

Round	Maximum Points
-------	----------------

	Round 1	19
	Round 2	19
	Round 3	19
	Round 4	19
	Round 5	32
	TOTAL	108 Points

Lawpardy: A Law Jeopardy Game

Description:

This competition is a jeopardy-inspired academic competition designed to reinforce cadets' knowledge of the law subjects offered by the Department namely, Law and Discipline, Human Rights and Peace Studies, and International Law and International Humanitarian Law. Through an engaging and competitive format, this competition promotes legal literacy, critical thinking, teamwork, and sound judgment while fostering a deeper appreciation of the rule of law and its importance in military leadership and decision-making.

Objectives:

1. Assess cadets' understanding of fundamental legal principles taught in courses under the Department of Social Sciences.
2. Reinforce learning outcomes from Law and Discipline, Human Rights and Peace Studies, and International Law and International Humanitarian Law.
3. Develop critical thinking, analytical reasoning, and decision-making skills.
4. Encourage healthy academic competition among cadets.
5. Promote awareness of legal and ethical responsibilities of military officers.
6. Enhance teamwork, communication, and leadership under time constraints.
7. Foster appreciation for the rule of law, human rights, and international humanitarian norms.

Personnel-in-Charge:

Implementing Department: Department of Social Sciences

Officer-in-Charge: MAJ ANG-MELOTE PROF

Assistant: P2LT TREPTOR PROF

Team Composition:

Each company shall have one (1) team composed of 3 cadets each from the 3rd, 2nd, and 1st class.

Mechanics:

Category	Description
Law and Discipline	Basic concepts and principles under Constitutional Law, Criminal Law, and Military Law
Human Rights	Rights and freedoms guaranteed to humans
Peace Studies	Conflict resolution, peacebuilding, and security
International Law	Sources, principles, and institutions of International Law
International Humanitarian Law	Geneva Conventions, Armed conflict, Rules of engagement
Legal Scenarios	Application of legal principles to practical situations

The competition shall consist of three (3) stages:

1. Elimination Round
2. Semifinal Round
3. Championship Round

Each round shall contain ten (10) questions with corresponding point values under the following categories:

1. Identification- 2 points
2. Enumeration- maximum of 3 points (1 point per correct answer)
3. Charade- 3 points
4. Modified True or False- 1 point (+1 point if correction was provided for false statements)
5. Final Lawpardy – wager and double the points wagered

Additional Guidelines:

1. To determine the team that will answer first, a coin toss will be conducted. The winning team will then proceed to choose the category from which their question will be taken.
2. Each team will have 10 seconds to answer the questions except for charades wherein participants shall have 60 seconds.
3. Failure to provide the correct answer is a chance for the opposing team to steal. Opposing teams will be given 5 seconds to steal.
4. At the conclusion of every round, the participating teams shall qualify for a Final Lawpardy. A final question shall be presented covering any of the identified courses. Teams will secretly wager a portion or all of their accumulated points. Teams will have one (1) minute to submit their answers in writing. Correct answers

will merit double the wagered points. Incorrect answers will result in the deduction of the wagered points.

5. In case of a tie, a tie breaker question will be administered. The first team to buzz and provide the correct answer will be declared the winner.

6. The top-performing teams for each round will advance to the next round.

Scoring:

E-games: Warfares

Description:

The competition is grounded on the theory of gamification. It is the practice of applying game-based mechanics in non-game settings to enhance engagement, decision-making, and performance.

World of Warships - offers a historically grounded naval combat simulation that helps midshipmen understand classic maritime warfare principles such as ship types, formations, firepower management, and tactical maneuvering. It sharpens strategic thinking, situational awareness, and decision-making under pressure—key competencies in naval leadership. The game also introduces players to the fundamentals of naval coordination, target tracking, and engagement timing, reinforcing essential concepts relevant to surface warfare and maritime operations.

Company of Heroes III - It ideal for a PMA e-games event as they promote tactical employment, simulate realistic military operations, and reinforce leadership and teamwork through cooperative play. Their historical and tactical relevance supports cadet education, while also fostering camaraderie, boosting morale, and aligning with the academy's push toward innovation and modern, tech-driven learning.

Wargame: Red Dragon - is an excellent choice as an E-game for promoting Joint Tactical Operations because it simulates modern joint operations and combined

arms across land, sea, and air domains, requiring players to think and act like operational-level commanders.

Objectives:

1. Enhance tactical thinking and decision-making by analyzing rapidly changing scenarios, making informed choices under time pressure.
2. Develop stress management and mental resilience by exposing the cadets in a competitive atmosphere, combined with strict time limits, that fosters resilience.

Personnel-in-Charge:

Implementing Department: Department of Information Technology

Officer-in-Charge: CPT TATARO PROF

Coordinator: 1CL SOGO-AN CCAFP

Assistant: E-Games society members

Team Composition:

- Modern Warships 3v3 Tournament: "The Bronze Blitz"
 - Three (3) players per company + One (1) substitute player
- CoH3 Tournament: "Iron Resolve"
 - Three (3) players per company + One (1) substitute player
- Wargame: Red Dragon
 - Three (3) players per company + One (1) substitute player
- Team composition is regardless of rank and class

Mechanics:

Modern Warships 3v3 Tournament: "The Bronze Blitz"

1. Format: The elimination round will be in a Round-Robin format among companies.
2. Match Length: It will be a best of three (3) in all the round from elimination rounds to championship round.
3. Ship & Upgrade Rules

Stage	Ship Tier	Upgrade Status	Preparation
Qualifiers (Rounds 1-7)	Tier 1 Base	Stock (0/10)	No upgrades allowed.
Semi-Finals & Finals	Tier 1 Base	Maxed (10/10)	15-Minute "Pit Stop"

4. Authorized Vessels

Ship Type	Eligible Vessels	Role Focus
Destroyers	USS Arleigh Burke, RF Admiral Panteleyev	Heavy Gunnery
Frigates	HMS Duke of York, HMS Montrose, INS Shivalik	Maneuverability
Corvettes	056 Jiangdao, JS Hayabusa	Fast Response/Capping

5. "Pit Stop" Rule: Immediately following the conclusion of the Round-Robin stage, the four advancing companies enter the 15-minute Technical Window.

- **Strict Timing:** A universal timer will be displayed/announced. Any team not ready for their Semi-Final match at the 15-minute mark will be forced to play with whatever upgrades they managed to complete.
- **Resource Management:** Players are responsible for ensuring they have enough Upgrade Points and Dollars saved up before the tournament starts. There is no time to grind for resources during the window.
- **Strategy Pivot:** Teams may choose to focus upgrades on different stats.

6. Compliance & Fair Play:

- **The "Dry Dock" Inspection:** Before the first match of the day, a referee or opposing captain can request a screenshot of the ship's upgrade screen.
- **Stat Checking:** Referees will monitor ship speeds. If a T1 ship exceeds its base "Stock" top speed (e.g., a ship that should go 18 knots is doing 24 knots), the team faces an immediate forfeit for that round.

7. General Mechanics & Conduct:

- **Disconnects:** If a player disconnects within the first 60 seconds and no damage has been dealt, the match is restarted. Otherwise, the game continues.
- **Draws:** If the timer runs out, the team with the most total HP remaining wins the round.
- **Substitutes:** Teams may register one substitute player. Once a match starts, no swaps are allowed until the next round.

CoH3 Tournament: "Iron Resolve"

1. Mode: Victory Point Control

2. Starting Points: 500

3. Time Limit: 30 Minutes

4. Victory Condition: First to 0 points or the team with the most points when the 30-minute timer expires.

5. Game Mechanics & Setup:

- Battlegroups: Fully Allowed from Round 1. Teams can coordinate call-ins and off-map abilities.
- Factions: Any (USF, Wehrmacht, UKF, DAK).
- Starting Resources: Standard (Manpower, Munitions, Fuel).
- Upgrade Progression: * Qualifiers: Base Units/Buildings Only. You cannot upgrade units via "Research" (e.g., No Infantry Section training, no vehicle survivability packages).
- Semi-Finals/Finals: Full Upgrades Allowed. All tech tree research and unit upgrades are unlocked.

6. Regulations:

- Sync-Kills: If a player crashes within the first 2 minutes, the match is restarted once.
- Map Selection: Gazala Landing (Game 1), Pachino Farmlands (Game 2), Melfa River (Game 3).

Wargame: Red Dragon

1. Match Duration: Strictly 60 minutes time duration

2. Mode: Conquest (Point Limit: 1000).

3. Upgrades: None. Static loadouts only.

4. Joint Mission Loadouts: Every company is restricted to three provided deck codes. These decks are balanced for 60-minute sustainability (higher card counts for logistics and infantry).

- Task Force Alpha (Amphibious/Inland): Focuses on landing ships, marines, and light tanks.
- Task Force Bravo (Heavy Support): Focuses on Destroyers, heavy artillery, and Main Battle Tanks.
- Task Force Charlie (Air/Sea Denial): Focuses on interceptors, SEAD, and Anti-Ship missile corvettes.

5. The Battlefield: "Straight to the Point" (3v3)

- This map is mandatory as it features a central naval corridor and flanking land routes, forcing Joint Mission Capabilities.
- Naval Requirement: A team must maintain at least one naval unit on the map at all times. If a team's entire fleet is sunk, they suffer a -1 Conquest point penalty per tick until a new ship is deployed.
- Logistics: In a 60-minute game, FOBs (Forward Operating Bases) are critical. Each team is provided 2 FOBs in their starting loadout.

Scoring:

Modern Warships 3v3 Tournament: "The Bronze Blitz"

1. Scoring: 3 pts for a Match Win, 0 for a Loss. Tie-breakers decided by Map Differential, then Head-to-Head results.
2. Compliance: Using upgraded ships during Qualifiers results in an immediate forfeit of the match.
3. Map Pool: *Islands of Iceland* (Game 1), *Lost City* (Game 2), *Arctic* (Game 3).
 - Equipment Lock: Players cannot change their ship or weapons once a BO3 series begins. They must use the same "Fleet Loadout" for all 3 maps against that specific opponent.

Since this is a Round-Robin, the winner is determined by the final standings on the leaderboard.

1. Match Points: 3 pts for a win, 0 pts for a loss.
2. Map Differential: Total Maps Won minus Total Maps Lost (e.g., a 2-1 win is a +1).
3. Head-to-Head: If two teams are tied in points and differential, the winner of their direct match-up takes the higher seed.

CoH3 Tournament: "Iron Resolve"

With a hard 30-minute limit, games are decided by the Victory Point (VP) count:

Condition	Winner
Annihilation/0 VPs	Immediate Winner
Timer Hits 30:00	Team with the Highest VPs remaining wins
VP Tie at 30:00	Team with the Highest Total Damage Dealt (Post-game stats)

Wargame: Red Dragon

1. Point Victory: The first team to reach 1000 Conquest points.
2. Timer Victory: The team with the most points at the 60:00 mark.
3. Total Wipeout: If a team loses all Command Vehicles (CVs) and cannot afford a new one, they lose immediately.
4. No Upgrades: Any modification to the provided deck veterancy or unit choice results in a disqualification for that round.
